

DEFENSESTORM

PROFILE

- More than \$750M in assets
- 9 branches
- Approximately 57,000 members
- 140 employees

CHALLENGE

The credit union was operating with an in-house system network administrator and realized they were drastically under-resourced to host the kind of system required to manage their level of cyber risk.

SOLUTION

THREAT SURVEILLANCE plus Cyber Threat Surveillance Operations (CTS Ops)

GOVERNANCE PROGRAM

IMPACT

- **Improved alerts and response time** to network anomalies
- Insightful and **substantiated information** about critical incidents
- **Continually evolving modules** to address new regulatory requirements

“Their quick response to any network anomaly has been extremely impressive. When a critical incident is triggered, the CTS Ops team calls immediately, armed with evidence. With DefenseStorm, someone has already done the leg work, giving us a focused view of what's going on and how we can resolve it.”

“We were set up with a product that works well and serves our unique needs as credit union.”

Kevin Quinn
Chief Information Officer
NuMark Credit Union
