Microsoft Defender Threat Ops Services

EXTEND MICROSOFT DEFENDER WITH BANK-GRADE SECURITY EXPERTISE

Proactive ThreatOps Services from DefenseStorm

DefenseStorm ThreatOps extends Microsoft Defender with expert monitoring, financial-sector intelligence, and a SIEM built for banking—unlocking its full potential.

YOU'VE GOT DEFENDER. NOW MAKE IT WORK FOR BANKING.

- Most banks already license Defender—but without tuning & 24×7 monitoring, its value goes untapped.
- Regional banks and credit unions face unique threats, regulatory scrutiny, and staffing challenges that Defender alone doesn't solve.
- DefenseStorm closes that gap with banking-specific monitoring, human-led triage, and compliance-ready response.

OUR SERVICE TIERS
CHOOSE THE LEVEL THAT FITS YOUR MICROSOFT 365 LICENSE AND SECURITY MATURITY

Tier 1
Endpoint-Only ThreatOps

Best for: Financial institutions seeking enhanced endpoint protection without adding staff

Requires: Microsoft 365 E3 + Defender for Endpoint P2

Focused, expert-led endpoint protection

- 24×7 monitoring & triage of Defender endpoint alerts
- Custom detection rules & banking-specific threat intelligence
- GRID SIEM correlation for enriched alert context
- Actionable incident analysis with remediation guidance

Tier 2
Full Microsoft 365 ThreatOps

Best for: Financial institutions with Microsoft 365 E5 seeking unified, cross-domain coverage

Requires: Microsoft 365 E5

Cross-domain visibility and response

- Unified monitoring across endpoint, email, identity & cloud apps
- Cross-domain correlation to stop phishing-to-endpoint compromise
- Deeper investigations using expanded telemetry & attacker path analysis
- Sector-specific threat intelligence applied across all signals
